

PRODUCTION OF MAGAZINE

The production of the magazine each month frequently presents difficulties owing to our inability to obtain the services of a typist with the necessary machine and ability to lay out and prepare the stencils, which are normally run off by Ralph Moore (or more precisely - on his duplicating machine).

Even the agencies have let us down in this respect, and if any member would undertake this unenviable task each month he (or she) would be welcomed with open arms.

On the other hand members may know of a good typist who would undertake the work for a reasonable fee at set regular intervals.

Any bright suggestions-to Mag. Committee please.
