THE JAGUAR DRIVER'S CLUB

This Club has just been formed with the object of promoting sporting events and friendship amongst Jaguar Drivers and enthusiasts.

As a new Club we need many members to make our object successful. If you are interested in membership, full details will be sent you on application to the Secretary,

Mr. Eric G. Brown,
34, Onslow Gardens,
South Kensington,
London.S.W.7.

Telephone No. Knightsbridge
5526.

Through the Post!!.....

The Halda Speed Pilot

Halda Limited of Brandon Road, York Way, London, N.7 have sent us an interesting illustrated brochure of the Halda Speed Pilot which as most members will know is an average speed indicator giving an indication of minutes in front or behind schedule of average speeds from 22 to 70 m.p.h. This instrument appears to be extremely versatile as far as different makes of car are concerned.

The price of the Speed Pilot is 19 gns. with a fitting charge, if carried out by Halda, of £1.5.0d. The dimensions of the instrument are $5\frac{1}{2}$ " x $3\frac{3}{4}$ " and weighs $3\frac{1}{2}$ lbs. Any members interested in this device should either write direct to Halda Ltd. for full details or alternatively your Competition Secretary has a leaflet for perusal.

The Handa Overdrive

Vehicle Developments Ltd. of 60, Balcombe Street, London, N.W.1 have sent us illustrated leaflets on their series of overdrives. Vehicles to which this overdrive may be fitted include the Ford Consul, Zephyr, Zodiac, Anglia and Prefect, B.M.C. range using B.50 engine and the B.90 engine.

The price varies from £44 to £65 and the fitting charge ranges from £5.10.0d. to £10. This overdrive does not appear to be so easy to operate as the Laycock-Normanville version but nevertheless is thoroughly fool proof. Again you can get further details from Vehicle Developments Ltd. or alternatively your Competition Secretary.
